

# UNT MAKE-A-THON

# SPONSORSHIP PACKAGE

**March 28-29, 2020**

The main purpose of the multidisciplinary Make-a-Thon is to challenge Biomedical Engineering and other students to think creatively and apply their knowledge gained via their coursework to real-world medical problems. The Make-a-Thon aims to provide engineering students with hands-on experience using CAD and the design process where students will utilize 3D printing, computational modeling, instrumentation, and prototyping techniques in order to turn their designs into a functional device to present to clinical, industry and academic professionals from the rapidly expanding DFW Medical Community.

Please contact us at [untbmesthona@gmail.com](mailto:untbmesthona@gmail.com) if you are interested and want to discuss a particular sponsorship package
